

**OK1KIR 10G EME Old DB6NT 3cm LNA (NF \approx 0.7dB) vs new DU3BC 3cm LNA (NF \approx 0.6dB)
 May 2017**

Note:

Measurement was provided after direct insertion of each LNA without any further adjustments. Absolute NF figures are not precious, but Δ NF \approx 0.1dB is accurate and relates to specification of both LNAs. Graphs show much better selectivity of the new LNA.
